

# Zimbabwe – Manicaland Global Youth Tobacco Survey (GYTS) FACT SHEET . . . . .

The Zimbabwe – Manicaland GYTS includes data on prevalence of cigarette and other tobacco use as well as information on five determinants of tobacco use: access/availability and price, environmental tobacco smoke exposure (ETS), cessation, media and advertising, and school curriculum. These determinants are components Zimbabwe could include in a comprehensive tobacco control program. The Zimbabwe- Manicaland GYTS was a school-based survey of students in Forms 1, 2 & 3 conducted in 2003.

A two-stage cluster sample design was used to produce representative data for Zimbabwe – Manicaland. At the first stage, schools were selected with probability proportional to enrollment size. At the second stage, classes were randomly selected and all students in selected classes were eligible to participate. The school response rate was 100%, the student response rate was 90.4%, and the overall response rate was 90.4%. A total of 1985 students participated in the Zimbabwe - Manicaland GYTS.

## Prevalence

- 21.3% of students had ever smoked cigarettes (Boy = 25.6%, Girl = 15.6%)
- 19.8% currently use any tobacco product (Boy = 23.0%, Girl = 14.8%)
- 10.5% currently smoke cigarettes (Boy = 13.4%, Girl = 6.5%)
- 14.8% currently use other tobacco products (Boy = 16.9%, Girl = 11.5%)
